

ONE ISLAND. ONE COMMUNITY. ONE GOVERNMENT. ONE FUTURE

Jersey's Government has embarked on a programme of rapid transformation to deliver modern, quality, value-for-money public services for islanders.

We aim to support a sustainable society and internationally-competitive economy, with a strong partnership between a modern government, responsible business and islanders.

A four-year Government Plan, published recently, includes a commitment to nearly £350 million of capital investment to improve the Island's infrastructure and provide first class services for islanders.

We're recruiting to three roles, which will play a critical part in delivering our strategic priorities. We're looking for world-class skills to match our ambition, together with an appreciation of how to deploy those in a unique and precious island environment.

DIRECTOR OF PROPERTY

£COMPETITIVE

Reporting to the Director General for Growth, Housing and Environment, and leading a multi-disciplinary team, you will take responsibility for the Government's substantial property estate of more than 900 assets, ranging from historic buildings to modern offices. This is a significant opportunity to lead the modernisation of the Government's approach to corporate property, strategic asset management and facilities management. We need an experienced property professional who can liaise with a wide variety of stakeholders and deliver a modern public estate.

DIRECTOR OF CAPITAL PROJECTS

£COMPETITIVE

With the Government committed to a significant infrastructure programme, we require a joined-up approach, to ensure we meet our long-term objectives. Reporting to the Director General for Growth, Housing and Environment, you will lead a small, professional team and take responsibility for the Government's capital programme, working closely with partners, politicians and the public to help Jersey to remain an internationally-competitive place to do business, while providing outstanding facilities for our islanders and visitors.

PROJECT DIRECTOR, OUR HOSPITAL

£COMPETITIVE

The Government is committed to building a new, state-of-the-art hospital to meet the Island's future healthcare needs. This ambitious project requires a Project Director, responsible for overall project direction, coordination and buildings delivery, and accountable to a high-level steering group chaired by the Chief Executive. You will have experience of delivering large and complex public sector building projects – ideally a hospital – from briefing to construction, commissioning and handover.
