Five tips for getting the best out of virtual meetings

This power hour will cover important psychological considerations in order to maximise the effectiveness of our virtual meetings. Operating remotely from our teams and colleagues is a new reality that, in one form or another, is here to stay. While technology has allowed us to connect in new and flexible ways, there are some really important psychological elements which can help us to ensure we get the best out of these interactions.

About Aidan

"I harness my extensive academic study and practical application of evidence based psychology to bring forward expertise in the fields of behavioural science and performance psychology. This enables my clients to optimise their performance, overcome obstacles and remain psychologically flexible."
